Body Treatments

PRICE LIST

Dermalux MD Light Therapy

Dermalux MD Light Therapy is a non-invasive skincare treatment using LED light to boost collagen, reduce inflammation, and rejuvenate the skin. It's painless, and provides a radiant complexion with no downtime.

 PROCEDURE	 RECOVERY	 RESULTS
30 minutes	Immediately	Instant

Dermalux	
Per session	£50
Course of 3	£135
Course of 6	£260

Fat Cavitation

Fat cavitation, a non-invasive ultrasound treatment, breaks down stubborn fat cells as a painless alternative to liposuction. Visible results emerge after a few sessions, sculpting and toning the abdomen or thighs.

 PROCEDURE	 RECOVERY	 RESULTS
1 hour	24 hours	Immediately

Cavitation	
Single	£75
4 sessions	£260
8 sessions	£500

Fat Freezing

Fat freezing, or cryolipolysis, is a non-invasive treatment that eliminates stubborn fat through controlled cooling with no needles or downtime. It's effective for sculpting areas like the abdomen and thighs, love handles.

 PROCEDURE	 RECOVERY	 RESULTS
Up to 2 hours	Immediately	2-6 months

Cryolipolysis			
1 area	£150	4 areas	£450
2 areas	£250	8 areas	£750
3 areas	£350	14 areas	£1000

Genie Slimming and Toning

Genie Slimming and Toning is a non-invasive technology using muscle stimulation for quick body contouring with no downtime. It's a convenient solution for a sculpted physique.

 PROCEDURE	 RECOVERY	 RESULTS
45 minutes	Immediately	4+ sessions

Body Slimming and Toning	
Single	£40
Course of 10	£350

HIFEM®

HIFEM treatment is a non-invasive solution for efficient muscle toning, using high-intensity focused electromagnetic technology. Quick and effective, it's ideal for convenient muscle sculpting.

 PROCEDURE	 RECOVERY	 RESULTS
30 minutes	Immediately	4+ sessions

Laser Hair Removal

Laser Hair Removal is a non-invasive, virtually painless treatment that uses concentrated light for long-lasting removal of unwanted hair, providing smooth and hair-free skin.

 PROCEDURE	 RECOVERY	 RESULTS
Up to 1 hour	Immediately	2 weeks

Laser Tattoo Removal

Laser tattoo removal uses focused light to gradually fade tattoos over multiple sessions, allowing for the removal or revision of unwanted ink with minimal damage to the surrounding skin.

 PROCEDURE	 RECOVERY	 RESULTS
30 minutes	1 week	After 3 sessions

Mole/Skin Tag Removal

CryoPen treatment is a fast, non-invasive method that uses controlled freezing to remove skin imperfections like warts and skin tags. It offers a precise solution with minimal pain and downtime.

 PROCEDURE	 RECOVERY	 RESULTS
15 - 30 minutes	2 weeks	2 weeks
